

EasyCart

Manual Testing Project — QA Overview

E-Commerce Website | Frontend Functional & UI Testing

Prepared By: Keerthana S

Date: 01/09/2026

1. What's My Project

EasyCart is an E-Commerce Web Application built for online shopping — browsing products, searching, managing a cart, checking out and paying.

This project covers manual, black-box testing of the customer-facing frontend to validate that every core shopping flow works as required.

APPLICATION TYPE

E-Commerce Web Application

TESTING TYPE

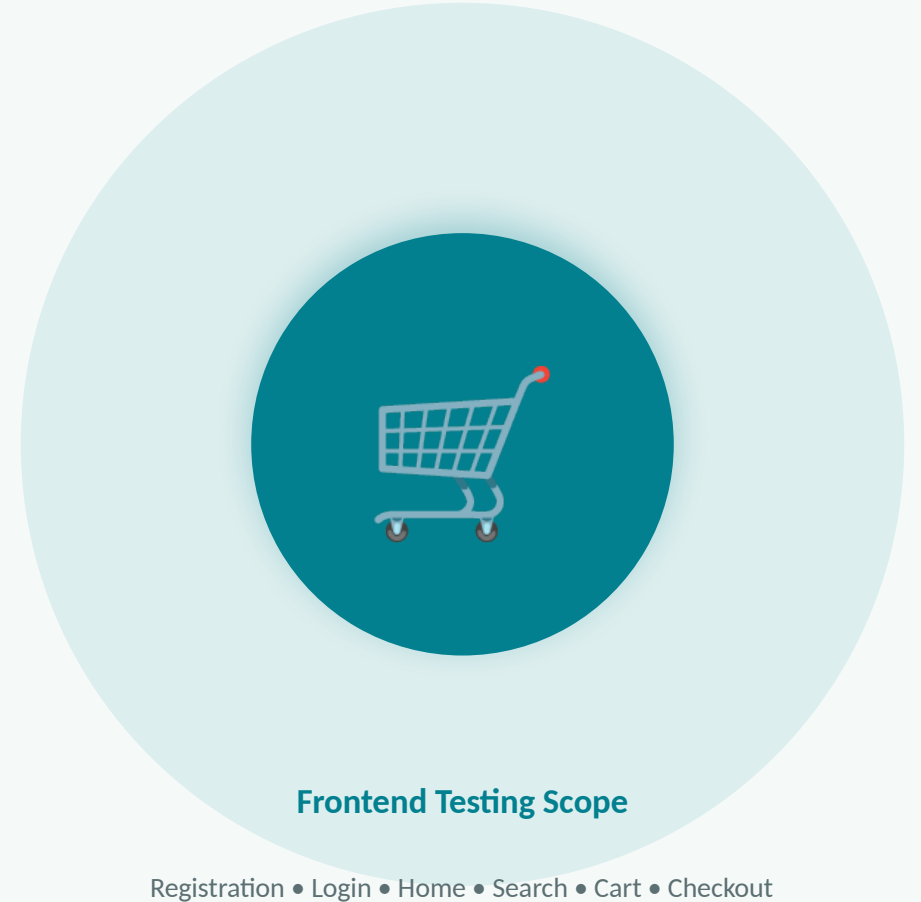

Functional & UI Testing

APPROACH

Manual Testing

TESTER

QA Tester (Keerthana S)

2. Backend & Test Environment

EasyCart's backend and infrastructure details, as observed/configured for this testing cycle:

Database	MySQL
Network	Stable Internet Connection (Wi-Fi / Mobile Data)
Operating System	Windows / macOS / Android
Browser	Google Chrome, Safari (latest stable)
Test Device	Desktop / Laptop & supported mobile browsers

Out of Scope

- Internal payment gateway logic
- Third-party courier systems
- Performance testing
- Database testing (DB itself)

3. How Many Modules?

7

Modules
Covered

Registration

Login

Home Page

Search

Product Details

Shopping Cart

Checkout

4. Test Cases Planned

100

Total Planned
Test Cases

across 7 modules

Testing types covered by these test cases:

Functional Testing	Yes
Positive Testing	Yes
Negative Testing	Yes
UI Testing	Yes
Integration Testing	Basic coverage
Usability Testing	Basic coverage
Compatibility Testing	Basic coverage

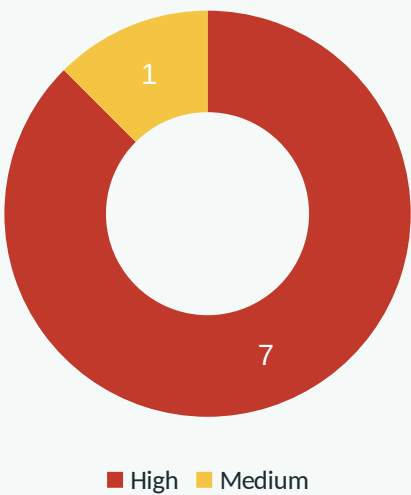

5. About Defects

Key Defects (by Module)

Defect ID	Module	Summary	Severity
DEF_EC_001	User Registration	Weak password accepted	High
DEF_EC_002	Home/Product/Cart/Checkout	404 error after page refresh	High
DEF_EC-003	Product Search	"No Product Found" on valid search	Medium
DEF_EC_004	Order	Invalid address accepted	High
DEF_EC_005	Order	Invalid postal code accepted	High
DEF_EC_006	Order	Invalid mobile number accepted	High
DEF_EC_007	Order	Invalid email accepted at checkout	High
DEF_EC_008	Shopping Cart	Cart total calculation mismatch	High

Defect Severity Distribution

6. Problems Faced in This Project

Recurring, high-impact issues surfaced during testing:

Weak Input Validation

Invalid emails, postal codes, mobile numbers and weak passwords are accepted instead of being rejected across Registration and Checkout.

Search Reliability

Valid product searches return "No Product Found" — partial & case-insensitive search also fails.

Cart Total Mismatch

Displayed cart total does not match the sum of item prices and charges.

Page Stability on Refresh

Home, Product Details, Cart and Checkout pages throw a 404 error after a browser refresh.

7. How Much Is Covered?

7 Modules Fully Covered

All 7 planned modules have been tested

90%

of planned test cases covered
90 of 100 planned cases

7 modules fully covered; test execution coverage is 90% of the 100 planned test cases.

Test Case Coverage

■ Covered: 90 ■ Remaining: 10

8. Future Engagement

Recommended next steps to strengthen quality beyond this cycle:

1 Defect Retest & Regression

Once the 8 logged defects are fixed, retest each one and run full regression across affected modules before release.

2 Complete Remaining Modules

Execute pending planned cases for Wishlist, Payment and Order to close out the 149-case plan.

3 Expand Test Types

Bring performance, security and database testing into scope — currently excluded.

4 Automation

Automate stable, high-traffic flows (Login, Search, Cart) to speed up future regression cycles.

5 Broader Compatibility

Extend device/browser/OS coverage beyond Chrome & Safari on Mac/Windows/Android.

9. Test Summary

7

Modules

100

Test Cases Planned

91

Cases Covered

8

Defects Found

Overall Status

EasyCart frontend testing covered 7 modules: Registration, Login, Home, Search, Product Details, Shopping Cart and Checkout. 91 of 100 planned test cases were covered.

8 defects were identified during testing and require retest after fixes.

Recommendation

Fix and retest the 8 defects, then complete the remaining planned test cases to reach full coverage.

Thank You

Questions on the EasyCart Test Plan, Defects or Summary Report are welcome.
